

Florida Arbovirus Surveillance

Week 30: July 26-August 1, 2026

Arbovirus surveillance in Florida includes endemic mosquito-borne viruses such as West Nile virus (WNV), Eastern equine encephalitis virus (EEEV), and St. Louis encephalitis virus (SLEV), as well as exotic viruses such as dengue virus (DENV), chikungunya virus (CHIKV), Zika virus (ZIKV), and California encephalitis group viruses (CEV). Malaria, a parasitic mosquito-borne disease, is also included. During the period of July 26-August 1, 2026, the following arboviral activity was recorded in Florida.

WNV activity: No human cases of WNV infection were reported this week. No horses with WNV infection were reported this week. Ten sentinel chickens tested positive for antibodies to WNV in Bay, Brevard, Hillsborough, Leon, Pasco, and Walton counties. In 2026, positive samples from one symptomatic human, one asymptomatic blood donor, and 25 sentinel chickens have been reported from 11 counties.

SLEV activity: No human cases of SLEV infection were reported this week. No sentinel chickens tested positive for antibodies to SLEV this week. In 2026, one case of SLEV has been reported from one county.

EEEV activity: No human cases of EEEV infection were reported this week. No horses with EEEV infection were reported this week. Three sentinel chickens tested positive for antibodies to EEEV in Walton County. In 2026, positive samples from 30 sentinel chickens and three horses have been reported from 11 counties.

International Travel-Associated Dengue: Two cases of dengue were reported this week. In 2026, 51 travel-associated dengue cases have been reported.

Dengue Cases Acquired in Florida: Three cases of locally acquired dengue were reported this week. In 2026, four cases of locally acquired dengue have been reported from three counties.

International Travel-Associated Chikungunya Fever Cases: Five cases of chikungunya fever were reported this week. In 2026, 44 cases of travel-associated chikungunya fever have been reported.

Chikungunya Fever Cases Acquired in Florida: No cases of locally acquired chikungunya fever were reported this week. In 2026, no cases of locally acquired chikungunya fever have been reported.

International Travel-Associated Oropouche Fever cases: No cases of Oropouche fever were reported this week. In 2026, no cases of travel-associated Oropouche fever have been reported.

International Travel-Associated Zika Fever Cases: No cases of Zika fever were reported this week. In 2026, no travel-associated Zika fever cases have been reported.

Zika Fever Cases Acquired in Florida: No cases of locally acquired Zika fever were reported this week. In 2026, no cases of locally acquired Zika fever have been reported.

Advisories/Alerts: Alachua, Leon, Palm Beach, and Pasco counties are currently under a mosquito-borne illness advisory. Hillsborough and Miami-Dade counties are currently under a mosquito-borne illness alert.

There are currently multiple travel health notices from the Centers for Disease Control and Prevention related to mosquito-borne diseases.

Dengue			Oropouche	Yellow Fever	Chikungunya		Malaria
Africa and Middle East	Americas	Asia and the Pacific Islands	Americas	Americas	Africa	Americas	Africa and Middle East
Kenya	Bolivia	Cambodia	Brazil	Colombia	Mauritius	Bolivia	Mayotte
	Colombia	Maldives	Cuba	Venezuela	Seychelles	Costa Rica	Yemen
		Malaysia	Panama			French Guiana	
		New Caledonia	Peru			Suriname	
		Samoa					
		Sri Lanka					
		Tonga					
		Vietnam					

Level 1 Travel Health Notice, Level 2 Travel Health Alert: wwwnc.cdc.gov/travel/notices.

2026 Human Case Summary

West Nile Virus Illness Acquired in Florida: In 2026, one human case of WNV illness acquired in Florida has been reported in Alachua County (May). One asymptomatic blood donor has been reported in Leon County (July).

2026 International Travel-Associated Chikungunya Cases: Forty-four cases with onset in 2026 have been reported in individuals with travel history to a chikungunya-endemic area in the two weeks prior to onset. Counties reporting cases were: Alachua, Broward, Collier, Hernando, Hillsborough (8), Miami-Dade (23), Monroe (2), Okaloosa, Orange (2), Osceola, and Palm Beach (3). Countries of origin were Bolivia (2), Brazil (2), Cuba (37), Guyana, Nicaragua, and Surinam. One case was reported in a non-Florida resident.

2026 International Travel-Associated Dengue Cases: Fifty-one cases with onset in 2026 have been reported in individuals with travel to a dengue-endemic area in the two weeks prior to onset. Counties reporting cases were: Brevard, Broward (6), Hillsborough (4), Lake, Lee (2), Manatee, Miami-Dade (22), Orange (2), Osceola, Palm Beach (4), Polk, Sarasota, Seminole, St. Johns, St. Lucie (2), and Walton. Two cases were reported in non-Florida residents. In 2026, 43 cases of dengue reported in Florida have been serotyped by PCR. Please see the table below for a breakdown of cases by country of origin and serotype.

Country of Exposure	DENV-1	DENV-2	DENV-3	DENV-4	DENV-2/ DENV 3	Unknown	Total
Brazil		1					1
Colombia	1		2	1		1	5
Cuba		16	1	1	1	4	23
Dominican Republic		1				1	2
El Salvador			1				1
Guatemala			1				1
Guyana		2				1	3
India		1	1				2
Indonesia		1					1
Mexico			1			1	2
Nicaragua	1		4				5
Peru			1				1
Puerto Rico			4				4
Total	2	22	16	2	1	8	51

2026 Dengue Cases Acquired in Florida: In 2026, four cases of locally acquired dengue have been reported in Hillsborough (2), Miami-Dade, and Palm Beach counties with onset in July (4). Three cases have been serotyped by PCR. Please see the table below for a breakdown of cases by county and serotype.

County of Exposure	DENV-2	Unknown	Total
Hillsborough	2		2
Miami-Dade		1	1
Palm Beach	1		1
Total	3	1	4

2026 International Travel-Associated Malaria Cases: Twenty-seven cases with onset in 2026 have been reported in individuals with travel history to a malaria-endemic area. Counties reporting cases were: Alachua, Broward (3), Duval (4), Hernando, Hillsborough (4), Lee (2), Leon, Marion, Miami-Dade (4), Orange (2), Palm Beach, Pinellas, Seminole, and Washington. Two cases were reported in non-Florida residents. Please see the table below for a breakdown of cases by country of origin and *Plasmodium* species.

Country of Exposure	<i>Plasmodium falciparum</i>	<i>Plasmodium ovale</i>	<i>Plasmodium vivax</i>	Total
Cameroon	2	1		3
Gabon	1			1
Gambia/Sierra Leona	1			1
Ghana	1			1
India			1	1
Kenya	2			2
Liberia	3			3
Malawi	1			1
Nigeria	7			7
Papua New Guinea			1	1
Sudan	1			1
Togo	1			1
Tanzania	2			2
Uganda	1	1		2
Total	23	2	2	27

Veterinary Cases**

**Veterinary cases are reported by date of onset. Only mammalian veterinary cases are included in the graphs.

No veterinary cases were reported this week.

Sentinel Chickens

The table below is for the reporting of confirmatory laboratory results from this week. Some of the samples were collected at earlier dates. The date of collection is recorded for samples collected on that day along with the total number of positives and the corresponding seroconversion rate for the week the sample was collected.

Ten sentinel chickens tested positive for antibodies to WNV in Bay, Brevard, Hillsborough, Leon, Pasco, and Walton counties. Three sentinel chickens tested positive for antibodies to HJV in Martin, Seminole, and Volusia counties. Three sentinel chickens tested positive for antibodies to EEEV in Walton County.

County	Collection Date	Seroconversion Rates (%)						County Totals	
		Flavi	SLEV	WNV	Alpha	EEEV	HJV	Collection Week	YTD
Bay	7/20/2026	5.56		5.56				1 WNV	2 WNV
Brevard	7/16/2026	1.45		1.45				1 WNV	3 EEEV, 1 SLEV, 1 WNV
Hillsborough	7/20/2026	2.22		2.22				1 WNV	1 EEEV, 1 WNV
Leon	7/20/2026	3.57		3.57				1 WNV	2 WNV
Martin	7/2/2026				2.38		2.38	1 HJV	1 HJV
Pasco	7/20/2026	3.45		3.45				2 WNV	4 WNV
Seminole	7/6/2026				2.38		2.38	1 HJV	1 HJV
Volusia	7/6/2026				2.08		2.08	1 HJV	3 EEEV, 2 HJV, 2 WNV
Walton	7/13/2026	4.44		4.44	2.44	2.44		1 EEEV	13 EEEV, 1 HJV, 6 WNV
	7/20/2026				2.20	2.20		4 WNV, 2 EEEV	

Sentinel Seroconversions to WNV in Florida, 2025–2026

Sentinel Seroconversions to EEEV in Florida, 2025–2026

Mosquito Pools

No mosquito pools tested positive for EEEV or WNV this week.

County	Collection Date	Result	Species	County YTD
-	-	-	-	-

Dead Birds

The Fish and Wildlife Conservation Commission (FWC) collects reports of dead birds, which can be an indication of arbovirus circulation in an area. This week, 25 reports representing a total of 59 dead birds, including three crows, two raptors, and 14 doves were received from 18 counties.

In 2026, 1227 reports representing a total of 2899 dead birds (55 crows, 26 jays, 370 raptors, 130 doves) were received from 51 of Florida's 67 counties.

2026

County	Total Dead Birds	Crows	Jays	Raptors	Doves
Brevard	11	0	0	0	10
Broward	1	0	0	1	0
Duval	6	0	0	0	0
Escambia	1	1	0	0	0
Hillsborough	5	0	0	0	0
Lee	1	0	0	0	0
Manatee	1	0	0	0	0
Marion	1	0	0	0	0
Miami-Dade	1	0	0	0	1
Okaloosa	1	1	0	0	0
Orange	1	0	0	0	0
Palm Beach	16	0	0	0	0
Pasco	2	1	0	0	0
Pinellas	1	0	0	0	0
Polk	1	0	0	0	0
Santa Rosa	4	0	0	1	0
Sarasota	4	0	0	0	3
St. Johns	1	0	0	0	0

2026 Mosquito-Borne Disease Activity by County

County	Humans	Equines	Sentinel Chickens	Other
Alachua	1 WNV (May)			
Bay			2 WNV (1/12, 7/20)	
Brevard			3 EEEV (3/19, 5/14, 6/25) 1 SLEV (7/8) 1 WNV (7/16)	
Citrus			1 EEEV (3/17)	
Hillsborough	2 dengue (July)		1 EEEV (5/11) 1 WNV (7/20)	
Indian River			1 EEEV (6/12)	

County	Humans	Equines	Sentinel Chickens	Other
Leon	1 asymptomatic WNV blood donor (July)		2 WNV (7/14, 7/20)	
Martin			1 HJV (7/2)	
Miami-Dade	1 dengue (July)			
Orange			5 EEEV (4/21, 5/12, 6/2, 6/29, 7/7) 1 HJV (5/4) 1 WNV (2/23)	
Osceola		1 EEEV (7/1)		
Palm Beach	1 dengue (July)		1 HJV (3/23) 3 WNV (3/9, 6/16)	
Pasco			4 WNV (4/20, 7/13, 7/20)	
Pinellas			3 WNV (6/8, 6/15, 7/13)	
Polk			1 EEEV (5/18)	
Seminole		1 EEEV (6/16)	1 HJV (7/6)	
St. Johns			2 EEEV (4/27, 5/26)	
Volusia		1 EEEV (3/14)	3 EEEV (2/23, 3/23) 2 HJV (3/30, 7/6) 2 WNV (1/26, 3/16)	
Walton			13 EEEV (4/27, 5/4, 5/26, 6/15, 6/22, 7/7, 7/13, 7/20) 1 HJV (6/15) 6 WNV (4/6, 7/13, 7/20)

For more surveillance information, please see the DOH website at: www.floridahealth.gov/diseases-and-conditions/mosquito-borne-diseases/surveillance.html

For arbovirus surveillance information for the United States, please see the Centers for Disease Control and Prevention website at: www.cdc.gov/ncidod/dvbid/westnile/surv&control.htm

Case tallies included in the weekly Florida arbovirus surveillance report include confirmed and probable cases for EEE, WNV infection, SLE, dengue, chikungunya, and malaria by date of onset. Suspect cases are not included. Activity is mapped by county of exposure rather than county of residence. Case definitions being used in Florida are consistent with national criteria provided by the Council of State and Territorial Epidemiologists (CSTE) and may be viewed at: www.floridahealth.gov/diseases-and-conditions/disease-reporting-and-management/disease-reporting-and-surveillance/index.html. Case tallies reported by CDC do not include suspect cases and cases are reported by patient state of residence rather than where the exposure occurred. Data is provided by county health departments, Department of Health Bureau of Public Health Laboratories, Department of Agriculture and Consumer Services, mosquito control agencies, Florida Fish and Wildlife Conservation Commission, medical providers and veterinarians. Equine cases are provided by the Department of Agriculture and Consumer Services.
